

## OSTEO-SPIN · New MBST therapy device for the treatment of osteoporosis in Berlin

Since the 9<sup>th</sup> of April 2020, the practice for orthopaedics and trauma surgery in Berlin-Lichterfelde Dr. med. Rainer Biglmaier has the most modern MBST magnetic resonance therapy device for the gentle, non-invasive and non-medicinal treatment of osteoporosis – OSTEO-SPIN.

### OSTEO-SPIN · MBST whole-body therapy system

OSTEO-SPIN is a whole-body therapy system which allows a treatment of osseous structures, for example in the case of osteopenia, osteoporosis and injuries of the musculoskeletal system, that is safe and free of side effects. It is also used for the treatment of metabolic disorders of the bones and neuralgic indications as well as postsurgically and with the aim of accelerating wound healing processes. The patented medical technology of the MBST therapy device in TUEV-certified quality complies with current EU norms and can be used for all age groups.

### Widespread disease osteoporosis

Osteoporosis, also called bone loss, is a systemic condition of the skeleton which may affect all bones within the body. At first, an increased degradation of bone mass and a deterioration of the bone structure become apparent. The risk for fractures can increase as a consequence of the bone loss so that even small incidents can cause bone fractures, so called fragility fractures. Osteoporosis with fragility fractures is a serious condition which often causes pain, fear and not seldom a dependency on care. Typical are fractures of vertebral bodies, the femoral neck and the wrists. Especially fractures close to the hip and in the vertebrae of the spine can reduce the quality of life and the ability to live independently. The efficacy of MBST magnetic resonance therapy on osseous structures has been examined in several scientific studies and case reports in vitro and in a clinical setting. In general, these have reported the MBST therapy as free of pain, side effects and interactions and also a treatment that is gentle on the body.

### OSTEO-SPIN · Now in Berlin-Lichterfelde

For more than 20 years, Dr. med. Rainer Biglmaier and his team have treated all common orthopaedic and sports medical indications in the practice situated directly at Krandoldplatz with lots of commitment and success. On the 9<sup>th</sup> of April 2020, one of the first OSTEO-SPIN magnetic resonance therapy devices was installed in the practice for orthopaedics and trauma surgery in Berlin.

*Dr. med. Rainer Biglmaier: "MBST is a highly modern supplement of my surgical and conservative practice. Most of the patients that I have treated with MBST magnetic resonance therapy are satisfied with it. This therapy perfectly rounds off my range of treatment."*

### About MedTec Medizintechnik GmbH

Founded in 1998, MedTec Medizintechnik GmbH from Wetzlar has developed from a pioneer to world market leader in the field of therapeutically used MBST magnetic resonance technology. MedTec develops, produces and distributes the worldwide unique and patented technology that is used in MBST therapy system for human, veterinary and aesthetic medicine. Doctors, specialist, medical centres, hospitals, clinics and universities put their trust in the MBST therapy system today – not only in Germany and Europe but worldwide. It is MedTec's vision to enable a healthy, active and pain-free life for patients of nearly every age with its therapeutically used MBST technology. The MBST magnetic resonance therapy achieves that in the treatment of various degenerative diseases and injuries of the musculoskeletal system without needing drugs, injections, infusions, pain killers or surgical interventions. More than 1,000,000 hours of therapy have been applied with the MBST magnetic resonance technology so far without any side effects or interactions becoming known. MedTec Medizintechnik GmbH stands for global leadership of market and technology with its worldwide patented therapeutically used MBST magnetic resonance technology.
